

We've taken the Bee Seen, Get Screened Pledge!

There are three cancer screening programmes offered for FREE on the NHS:

Breast Screening: Available to all women aged between 50-70.

Cervical Screening: For women and anyone with a cervix aged 25-64.

Bowel Screening: currently everyone aged 60-74, but gradually being lowered to start at 50. Home test kits are sent out through the post.

As your employer, we promise to:

Give staff time off to attend cancer screening or provide flexible working.

Raise the profile of health & well-being in the workplace.

Encourage our employees to talk about cancer & the importance of screening!
