

# TAKE PART IN CANCER SCREENING

The earlier that cancer is detected, the better. Screening can detect cancer at its early stages and sometimes before it even has a chance to develop.

Screening is available FREE on the NHS for three common cancers:

- Breast Cancer Screening is offered to all women aged 50-70.
- Cervical Screening, often called a smear test, is offered to women and anyone with a cervix aged 25-64.
- Bowel Cancer Screening is available to everyone aged 50-74. You will receive a home test kit through the post.

Ask at your GP Surgery if you've missed your latest screening!
